This is a follow up to a previous request:

Could you please clarify - is 100% of my request not stored digitally? If even one of the requested data points is stored digitally, then I would like to narrow my request to just that. However, if there are more data points available, I would like to narrow the request down to those fields. I do not have insight into what records are stored digitally, and what records are \*not\* stored digitally, and so it's borderline impossible for me to know how to narrow this request.

Surely there exists some finer set of records - a middle ground that follows the spirit of the law - that we can find together that avoids a half million dollar fee.
